

## Game Rules

1. All the rules are under control by an EOS smart contract to ensure the fairness and transparency.
2. At the beginning of each round, the price of each Diamond is 0.01 EOS, and increases 0.0001 EOS after every 1000 Diamonds sold. The formula of Diamond price is  $P = 0.01 + \text{ROUND}(N / 1000) * 0.0001$  (N: Sold keys number).
3. Transfer an amount of EOS to the contract account through your local wallet, then you can get an amount of Diamonds with the real time price which is temporarily locked price no matter how many Diamonds bought in one time, so buy more get more benefits. Buying Diamonds entitles you to DIVIDENDS from those who grab Diamonds after you, and also entitles you to the majority POT if you are the last person to buy Diamonds.
4. A referral code numbers MUST be filled for your first time buying transfer memo, and no referral code or wrong referral code in the 1st transfer will be denied by the contract. Once you make a successful buying with the referral code, the following Diamonds buying no need to fill memo any more for all rounds. You can get a referral link or referral code from your friends.
5. We strongly advise you SHOULD buy at least 100 Diamonds to activate your own referral code to refer other people through your link or code, since each time they grab some diamonds, you get 10% bonus, and if they refer more people, you can get the second level 5% bonus!
6. DIVIDENDS rules for each time buying Diamonds:
  - 75% EOS value goes to as below:
    - 10% goes to referral person
    - 5% goes to second level referral person (If has)
    - The rest (60% or more) goes to all Diamonds holders by ratio (Involving this time buying)
  - 20% EOS value goes to this round pot
  - 5% EOS value goes to developer team for maintain and EOS RAM/ CPU/NET deploy
7. Buying Diamonds adds an amount of seconds to the timer to a max of 24 hours, please refer to the timer and Heart-Beat moment rules.
8. If you are the last lucky dog successfully buying Diamonds and the timer runs out, you get to grab the round POT which is 20% EOS value of all! All Diamonds reset for the next round.
9. DIVIDENDS or POT income is saved to Vault balance for each user in real time. You can send 0.0001 EOS from your local wallet to the contract account to withdraw. (Tip: MUST NOT send from exchange account which is cannot used to withdraw)

## Timer and Heart-Beat Moment Rules

1. The max timer is 24 hours, and each round has two stages:
  - Normal time: left time is more than 2 hours

- Heart-Beat moment: left time is less than or equal to 2 hours
- 2. Buying Diamonds adds an amount of seconds to the timer to a max of 24 hours
  - Normal time: each Diamond increase 60 seconds to the timer
  - Heart-Beat moment: each Diamond increases 5 seconds to the timer
- 3. In Heart-Beat moment, the rule of minimum amount of Diamonds buying is enabled as below:
  - At least 100 Diamonds buying in remaining 110 to 120 minutes
  - At least 200 Diamonds buying in remaining 100 to 110 minutes
  - Similarly, increase 100 Diamonds every 10 minutes passing
  - At least 1200 Diamonds buying in the last 10 minutes
  - Less than minimum amount of Diamonds buying transfer will be denied by the smart contract, and will not become the last buyer.
- 4. If you are the last lucky dog successfully buying Diamonds and the timer runs out, you get to grab the round POT which is 20% EOS value of all! All Diamonds reset for the next round.

## Anti Cheating and Scripting Bot Design

The Heart-Beat Moment rule is to avoid the cheating and scripting bot to break the fairness of game and let the real lucky player to become the winner.

## Risk Tip

This game has the risk of losing the principal EOS, so the operation should be cautious. Remember, it's just a game! Don't put in too much EOS!
